“PFZ” Series Heavy Duty Knife Gate Valve Bonnet Style

PFZ series valves are bi-directional, full lug design, manufactured to MSS SP-81 and TAPPI TIS 405-8 standards for Industrial service applications. The PFZ series design assures non-clogging, shut-off of suspended solids.

The PFZ series Knife Gate Valve can be used for liquid, solid-liquid mixes / slurries, dry bulk solid applications. These valves are provided with full bore (100%) opening which does not restrict the flow of the media in pipeline.

Resilient seated valves offer a leak tight shutoff. Metal seated valves offer leakage within permissible limits as per MSS SP-81 standard to size 36" and to manufacturer's standard with acceptance by customer for sizes above 36".

PFZ Series Knife Gate Valve Features:

- Full lug type, MSS SP81 full bi-directional design, to ANSI B16.5 class 150 dimensions
- Cast body to 60" diameter; larger sizes, available on request.
- Sealing configurations: integral metal or resilient seat, secured in place with a stainless steel retainer ring with stainless steel fasteners.
- Zero leakage sealing achieved with independent resilient seats.
- Gate: Polished 316 / 316L Stainless Steel
- Stainless steel packing gland with combined PTFE packing with Viton O-rings
- Packing: Synthetic PTFE/Viton
- Rising stem as standard / Non rising stem is available on request.
- Operating options: Hand wheel / Hand Lever / Bevel Gear / Pneumatic Cylinder / Electric Actuator & Hydraulic Cylinder.

The PFZ Series Valves are available in the following Sealing Configurations:

- PFZ-M: Integral metal seat.
- PFZ-S: Resilient seat retained by stainless steel ring.

Standard Technical Specifications Materials of Construction

Standard Technical Specifications:

Manufacturing Standard	- MSS-SP 81 / TAPPI TIS 450-8 to 36" Manufacturer's standard for valves sizes above 36"
Lug / Flange	- Full Lug design 3" to 36", Flanged for larger sizes
Bore Opening	- Full bore (100%)
Flange Drilling	- ANSI B16.5 Class 150lb to 36" & MSS SP 44 for larger sizes
Face To Face	- MSS SP-81 to 36", Manufacturer's standard for larger sizes
Sealing Configuration	- Integral metal seat in "PFZ-M" - Resilient seat retained by stainless steel retainer ring in "PFZ-S"
Pressure Rating	- 150 PSI rated from 2" to 24", 100 PSI rated from 26" to 60" Full rated ANSI pressures for all sizes available on request
Nominal Size	- 3" to 60" (larger diameters upon request)

Materials of Construction:

Housing	- Cast Stainless Steel ASTM A 351 Gr. CF:8 / CF:8M / CF:3M / Duplex Stainless (other alloy materials on request)
Gate	- Stainless Steel ASTM A 240 Gr. 304 / 316 / 316L / Duplex Stainless Alloy (other materials on request)
Seat for PFZ-M	- SS304 / SS316 / SS317 (other materials on request)
Seat for PFZ-S	- Viton, EPDM, Buna, PTFE, Silicone (other materials on request)
Stem	- Stainless Steel ASTM A 276 Gr. 304 / 316, 17.4 Ph, Duplex
Packing	- PTFE Impregnated Synthetic Fiber with Secondary Viton O-rings

Live Loaded Packing Option

Painting | Testing

Temperature Suitability Chart

Packing Ring

Packing Assembly

Painting:

For non-stainless steel parts - Epoxy painted

Testing:

Body test pressure - As per MSS SP-81 Standard to 36" / As agreed mutually higher sizes

Seat leakage for PZ-M - 40 cc / min / inch at 2.8 bar as per MSS SP-81

Seat leakage for PZ-S - Zero leakage at full working pressure

TEMPERATURE SUITABILITY CHART

Resilient Seat			
Sr. no.	Material	Temperature rating (max)	Application
1	EPDM	248 °F	Acids & non-mineral oils
2	Viton	392 °F	Different chemicals (High temperature)
3	Buna-N	248 °F	Petroleum products

Gland Packing			
Sr. no.	Material	Temperature rating (max)	pH
1	PTFE Impregnated Synthetic Fibre	482 °F	2-13
